

**ADVANTECH** **INNOVATION HUB**

---

# The future has started

Current intelligent technologies already support people in daily tasks and activities – and the development of new technologies is progressing steadily. What does this mean for our industry? What kind of solutions and applications does the future hold? How central is the importance of the cloud? When are sensors useful? These are just a few of the questions that the Innovation Hub seeks to answer.

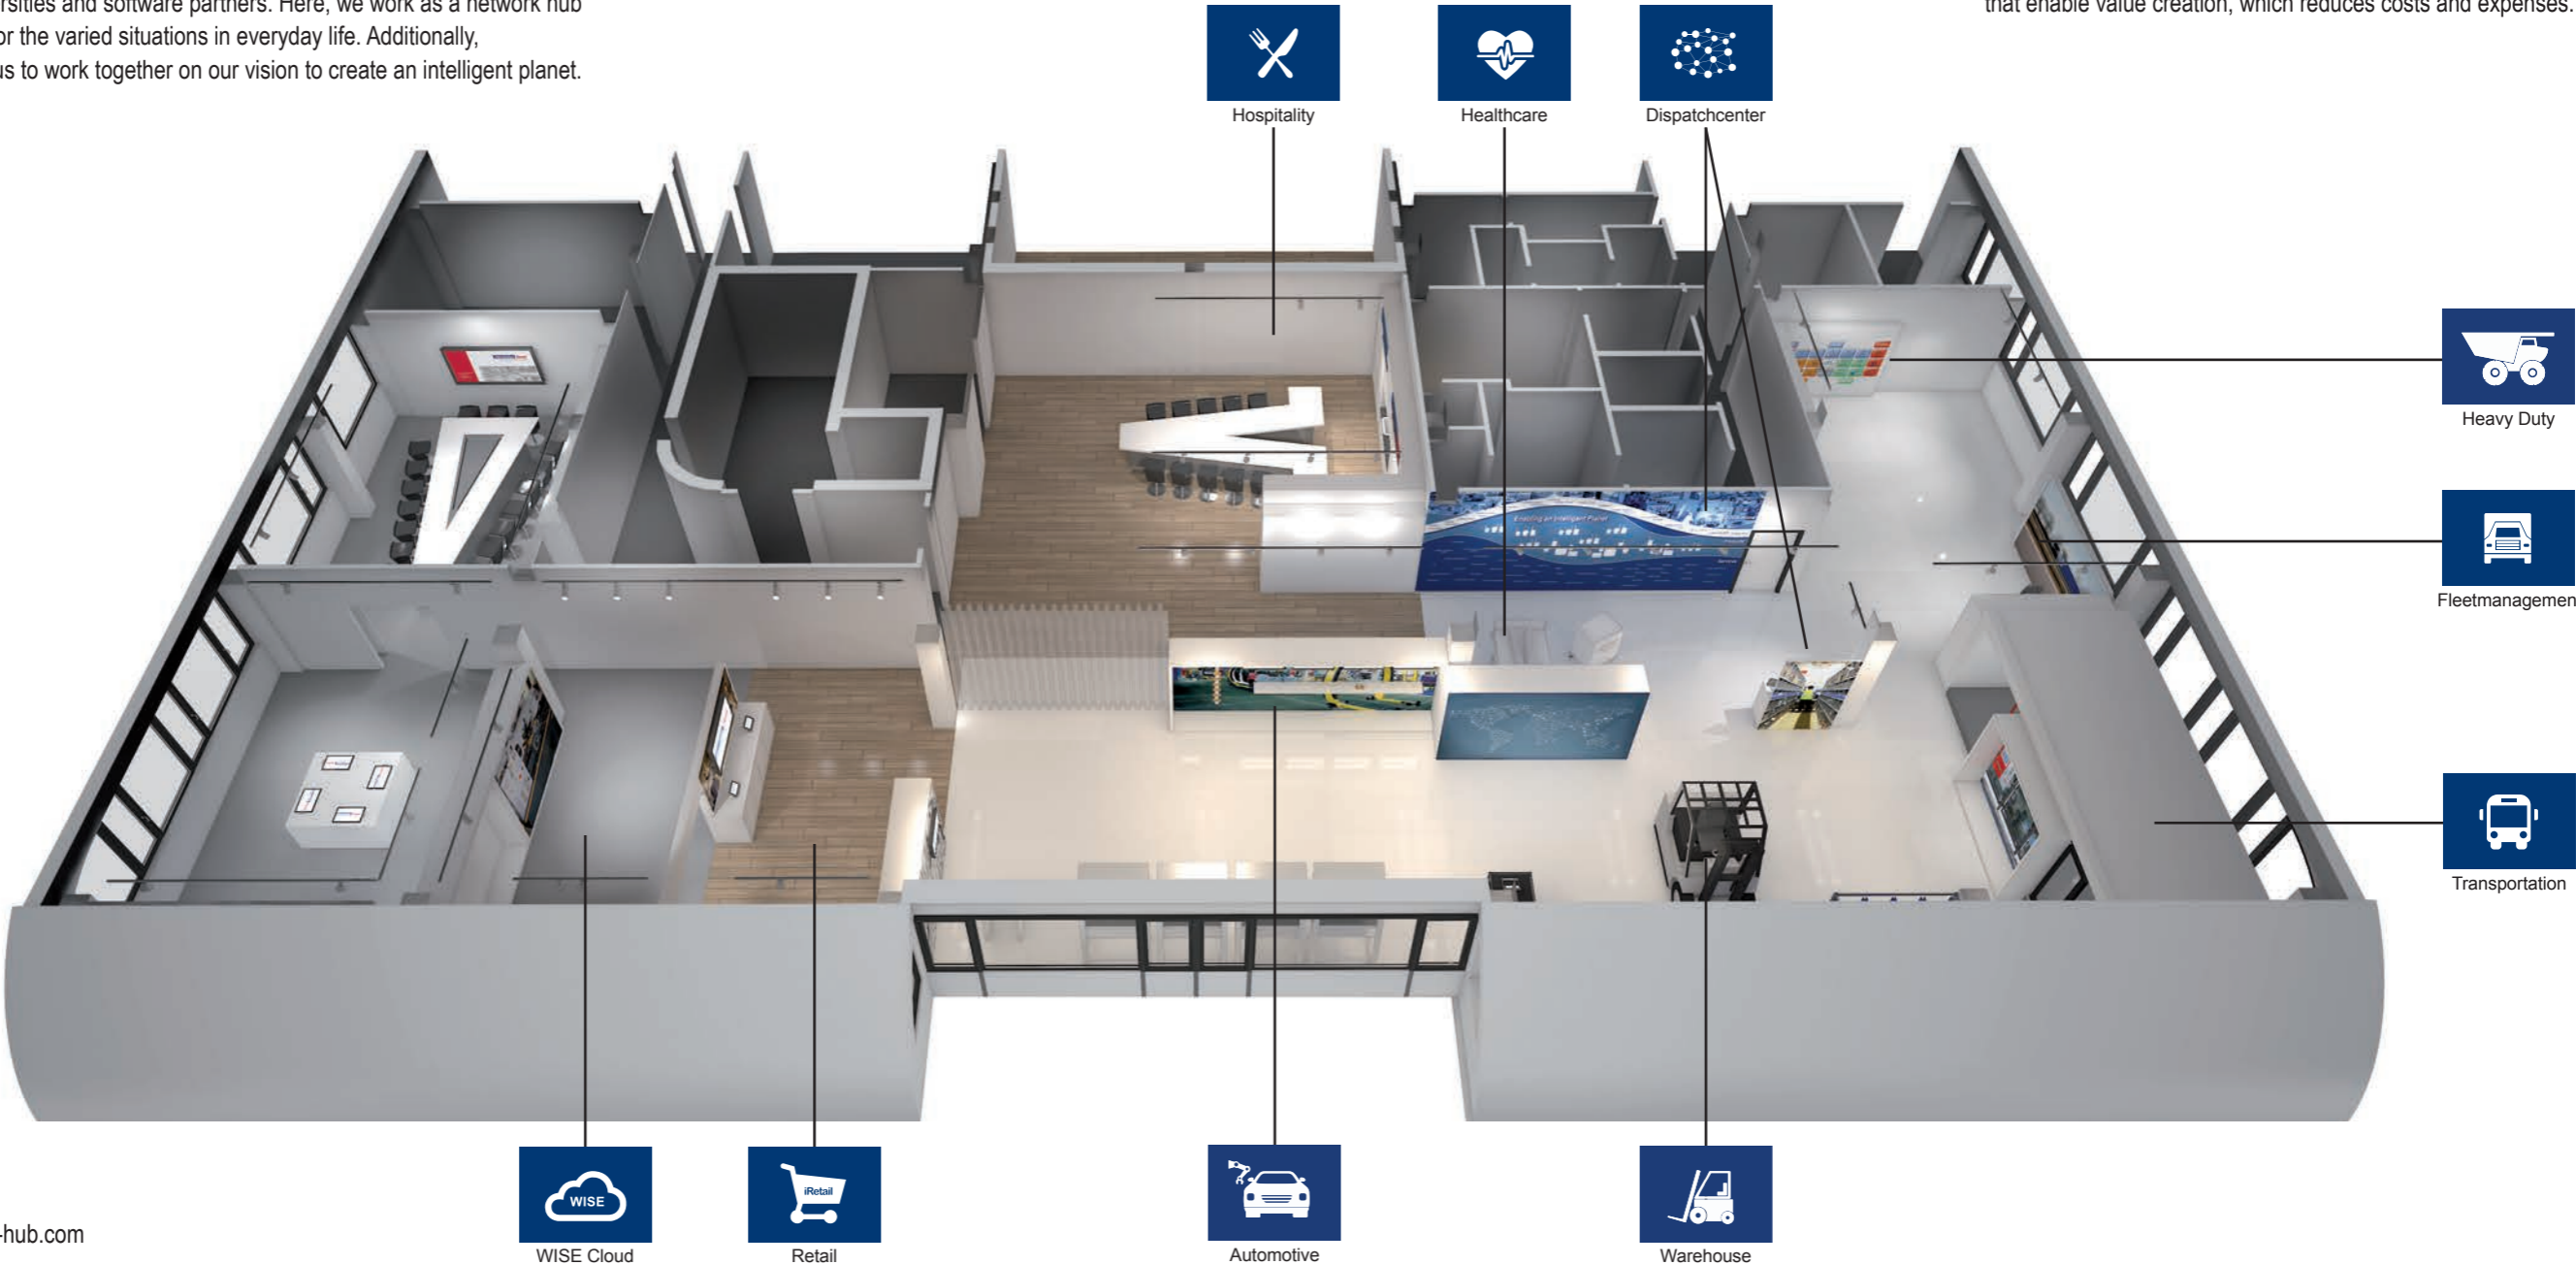

The comprehensive changes which will be possible in transport, logistics, production and many other industries are presented in the Advantech Innovation Hub. The innovative world of experience is one of our contributions to digitalization, an answer to the questions posed by the Internet of Things. Here, virtual concepts are transported into practice and are clear and easy comprehend.

# Innovative world of experience for global industry solutions

The Advantech Innovation Hub is a platform for a lively idea exchange with solution providers, customers, suppliers, universities and software partners. Here, we work as a network hub for solutions of the future, for the varied situations in everyday life. Additionally, the Innovation Hub allows us to work together on our vision to create an intelligent planet.

The Innovation Hub provides an insight into the diversity of modern technologies, it is a place that creates a link between hardware and software, developers and users, challenges and solutions. Visitors can experience the improvements that enable value creation, which reduces costs and expenses.

Statement of Manfred Lachauer,  
General Manager Advantech-DLoG

*"The Advantech Innovation Hub is not just a platform for partners to present their hardware or software products. It is a great way to showcase complete solutions and inspire people to get them on board for innovative ideas."*

Statement of Friedrich Steininger,  
CEO DE software & control GmbH,  
Partner of the Innovation Hub

*"With the Innovation Hub, Advantech-DLoG and its partners have created a pleasant and inspiring environment for Industry 4.0 discussions. The clever combination of technology and architecture will automatically foster a goal-oriented brainstorming."*

We would like to thank our technology partners.  
Through these solutions, the Innovation Hub becomes alive.  
And there will be continuously more and more!

**airgrrips®**, **WiQu** – Wireless quality since 1997, **WiCab** – Wireless “Cable” up to 40km, **WiNet** – for your productive WLAN network, **WiMesh** – stable multiple connections, **WiSpot** – for a secure guest and hotspot structure, **WiVoIP** – VoWLAN for HQ-voice
