

## **Advantech Launches LEO-WS10 Handheld Dimensioning and Barcode Scanner for Improved Operational Efficiency**

**Germering, August 2021** – Advantech, a leading provider of industrial computing solutions, is pleased to announce its LEO-WS10 handheld dimensioning and barcode scanner. Designed to streamline workflows for warehouse, logistics, retail, post office, airport luggage, and inventory management applications, LEO-WS10 accelerates package dimension scanning, improves collection and loading operations, and minimizes errors related to manual data entry. To ensure reliable operation in industrial environments, LEO-WS10 supports a wide operating temperature (-10 ~ 40 °C/14 ~ 104 °F) and is IP54 rated for protection from water and dust. Moreover, LEO-WS10 can be easily connected to any computer via USB or RS-232 and is compatible with Windows, Android, and Linux OS, enabling convenient deployment without additional hardware.

### **Instant Package Measurements**

Advantech's LEO-WS10 scanning solution transforms the measurement of packages. With LEO-WS10, users can simply aim the scanner at the package and press the trigger button to instantly obtain the package dimensions (L x W x H). This accelerates scanning and increases operational efficiency. In some cases, the adoption of LEO-WS10 at workstations has increased efficiency by up to 293%.

### **Integrated 1D/2D Barcode Scanner**

LEO-WS10 is also equipped with a 1D/2D barcode scanner. Thus, only a single device is needed to complete most package scanning tasks, reducing overall hardware costs and integrating workflows.

### **Laser Aiming Technology for Accurate Scanning**

Compared to stationary dimension scanners, LEO-WS10 features unique laser aiming technology that provides a guide for scanning packages accurately and easily.

### **Key Features**

- Handheld design for easy operation and portability
- Laser aimer for accurate scanning
- No pre-calibration required
- Compatible with any computer (verified performance with Advantech's DLT VMT series)

- Supports Windows, Android, and Linux OS

**About Advantech Service-IoT GmbH**

As a global player in intelligent IoT systems and embedded platforms, Advantech Service-IoT GmbH is part of Advantech Co., Ltd., founded in 1983 in Taiwan.

Advantech promotes IoT hardware and software solutions to drive IoT, Big Data, and Artificial Intelligence. It also supports business partners and customers in connecting industrial value chains. To help shape corporate ecosystems and accelerate the realization of industrial intelligence, Advantech leverages its ever-expanding networks of partners.

Within the support, sales and marketing network, more than 8,600 Advantech employees worldwide are committed to rapid time-to-market services.

The trade name Advantech-DLoG, which was introduced in 2010, will continue to exist as a product brand after the name change. The brand name originated from the former DLoG GmbH, has now been renamed Advantech Service-IoT GmbH and has been fully integrated into the Advantech Group.

**About Advantech**

Advantech's corporate vision is to enable an intelligent planet. The company is a global leader in the fields of IoT intelligent systems and embedded platforms. To embrace the trends of IoT, big data, and artificial intelligence, Advantech promotes IoT hardware and software solutions with the Edge Intelligence WISE-PaaS core to assist business partners and clients in connecting their industrial chains. Advantech is also working with business partners to co-create business ecosystems that accelerate the goal of industrial intelligence. ([www.advantech.com](http://www.advantech.com))
