

The vehicle terminal for frequent writers – The latest DLT-V7210K from Advantech-DLoG with integrated keyboard

The new Advantech-DLoG vehicle terminal DLT-V7210K has been equipped with a 55-key keyboard and number pad for easy handling as well as fast and secure data entries in distribution, logistics and warehouses.

Germering, April 24, 2017 – Just as in sports, logistics demands top performance – anytime, anywhere and even under toughest conditions. And just as in sports, the right equipment is also crucial in logistics for the service provided. With the new DLT-V7210K, Advantech-DLoG has now launched a vehicle terminal with integrated keyboard, which facilitates data collection and handling and it can even be exchanged in use.

Digital Logistics Terminal with integrated Keyboard

„The fast and simple handling of a vehicle terminal is the key to logistics“, says Manfred Lachauer, General Manager of Advantech-DLoG. Above all, where a lot of data must be collected, the recording must be efficient and error-free. Advantech-DLoG’s solution – a vehicle terminal with integrated keyboard.

The integrated keyboard eliminates the need to connect a separate keyboard in the first step. The keyboard is available in three country versions and can be changed in four easy steps. It is also possible to switch to another country version. The keyboard is illuminated; the brightness can be adjusted using front buttons, regardless of the brightness of the display.

Powerful vehicle terminals ensure performance and quality in logistics

As a successor to the MTC-6 series, the terminals of the DLT-V72 series are equipped with a wide range of functional improvements that further enhance the efficiency of logistics and warehouse management.

The new processor has tripled the performance of the vehicle terminal and the uninterrupted power supply ensures continuous operation. The built-in Wi-Fi and Bluetooth technology ensure interruption-free communication.

The DLT-V7210K is equipped with a high-resolution color display, the brightness of the display can be varied as required and it is easy to read even in bright sunlight. The touch screen of the scratch-resistant display is made of glass. Thanks to newly developed electronics, it can even be operated with thick gloves. The user can set the sensitivity of the PCT display individually using the configuration tool.

Various mounting options allow the use of the new vehicle terminal for a large number of different vehicle types. A comprehensive software portfolio supports the existing IT environment and company-specific requirements.

Features of the DLT-V7210K at a glance

- 10,1" color display with capacitive multi-touch-screen (PCT)
- 55-key keyboard incl. number pad in 3 country versions (QWERTY, QWERTZ, AZERTY)
- Programmable function keys
- Flat dual-band diversity-antenna
- Interfaces for external devices (LAN; 4x USB 2.0; 1x USB 3.0; 2x RS-232)
- Dust, splash and water-resistant up to IP65, vibration-insensitive after 5M3
- Impact-resistant screen according to IK08 as well as abrasion and scratch-resistant
- Temperature range from -30 °C to +50 °C
- Powerful Intel® ATOM™ Quad Core 1.91 GHz, 4 GB RAM, 8 GB CFAST or more
- Operating systems: MS Windows 10 IoT Enterprise, WES7, Windows 7 Prof., WE8S, Windows 8.1 Ind. Pro, Linux with graphical user interface, IGEL Linux
- Internal wide-range power supply for 12/24/48 V nominal
- Interruption-free power supply (UPS)
