

ADVANTECH

Trust Advantech Service-IoT GmbH

Depending on your company's situation, environment and needs, it can be a good idea to take out "comprehensive insurance" for the products you buy. Our ADD*Inclusive* service package covers all repairs, even if the damage is caused by the user.

- Also includes mechanical damage (provided this is not due to willful damage)
- Free repairs (including all spare parts and labor)
- Telephone service hotline and email support in German and English
- Repairs with short lead times
- If Advantech SiOT is responsible for the image beside the hardware, your device will be reconfigured and ready for use immediately once fixed

English

- Global service
- Customized services
- Professional helpdesk
- New options continuously added

Worldwide service and comprehensive support

Services ranging from advice to repairs

Service at its best!

The most important at a glance

Our German helpdesk and the Advantech Poland Service Center are the main points of contact for any questions or problems relating to the repair service for the entire Advantech Service-IoT GmbH product portfolio.

Benefits:

- Our staff have years of experience and extensive expertise
- Work closely with our engineers to solve problems quickly
- We have an in-house stock of spare parts, also for discontinued products

Service portfolio:

- Professional helpdesk
- Repair
- Lifecycle management
- Administration
- Service partner management
- Worldwide service management

Professional helpdesk - always available

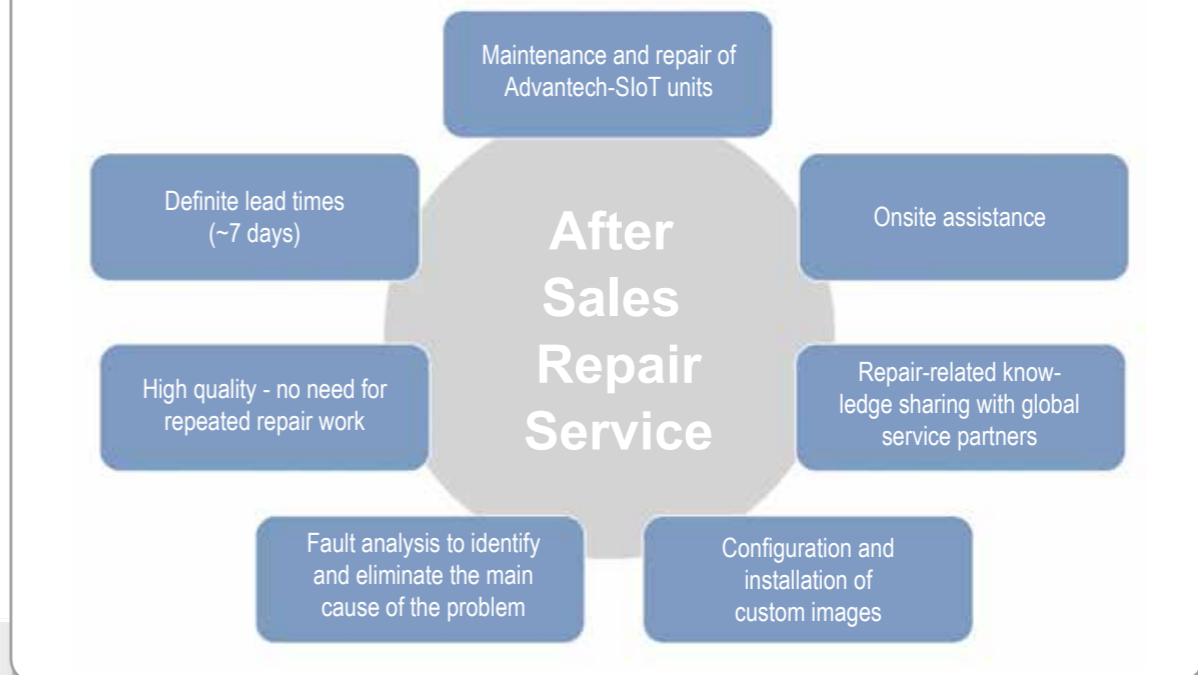

For every situation

Our helpdesk is open from 8 a.m. to 6 p.m. (CET), with an experienced team of staff available to support our customers by answering questions and solving technical problems.

Statistics show that today an average 90 percent of all issues are solved over the telephone. This is much cheaper and involves far less downtime than in the past when products had to be sent in for repair or technicians needed to travel to the site.
